

# Kahoot procedure

## To create your kahoot

1. go to <https://create.kahoot.it/>
2. create an username and password
3. click on button create
4. choose a quiz (possible to add competition scores, point the right answer), survey (gather opinions) or jumble (drag answers in correct order)
5. create a titel and introduction text
6. create the questions/statements you want your audience had to react upon.
7. after creating one question, immediately define your answers (if the answers are the same in all questions, you can duplicate the question + answer categories and change the question)
8. after finishing the kahoot, preview and test it via the button preview

## Play your kahoot

1. go to <https://create.kahoot.it/>
2. log in with your username and password
3. press the play button
4. choose if you want individual players or team players
5. you receive a pin code on the screen
6. direct your players to <https://kahoot.it/>
7. the players enter the pincode and a nickname
8. after all players are added, press the start button
9. the question/statement will be shown on the admin screen (teacher) and the answer categories will be filled out on the phone/laptop (electronical device) that your players use
10. discuss the results, they will appear on the screen after finishing the quiz/survey/jumble
